

Charleston Aluminum, LLC

Aerospace Metals

2024, 2219, 7050, 7075 and 7475 Alloys Sheet, Plate, Rod, Bar, Pipe, Tubing and Extruded Shapes

Charleston Aluminum, LLC specializes in aerospace sheet, plate and long products for all commercial and defense aerospace applications in both aluminum and steel. Our inventory consists of U.S. domestic and Western European produced materials from distinguished mills which are approved by all major aircraft manufacturers. We are one of the largest stocking distributors of aerospace aluminum sheet in the United States. Our friendly and knowledgeable sales staff will have you coming back for all or your future needs. We deliver throughout the US and Canada with our own fleet of trucks. Global shipping is also available. Whether you are building fuselages or wing panels, producing seat brackets, or machining engine components Charleston Aluminum supplies the highest quality materials and delivers with a superior level of service that our aerospace mainframe and repair customers have come to expect.

We have stocking locations in South Carolina, Florida and California. We offer shearing, saw cutting, PVC and paper interleaving. Water jet and laser cutting services are also available. We offer quick order fulfillment at competitive pricing. In many cases we can offer next day delivery via our fleet of company owned trucks.

Charleston Aluminum is a certified Small Business, certified Hub Zone Business and a Defense Logistics Agency bulk metals qualified supplier (Cage Code 34FP9).

Contact your aerospace metals sales specialist for a quote or to be placed on our email list to receive a weekly copy of our inventory.

CHARLESTON ALUMINUM PROVIDES:

- The highest quality metals from both U.S. domestic and DFARS compliant mill producers.
- Processing services include saw cutting to size, shearing, PVC and paper inter-leaving and other processing.
- Competitive pricing and on-time delivery.
- Delivery to points throughout the country.
- Full product traceability.
- We also carry other high quality metals such as carbon alloys, titanium stainless, alloy steel, brass, copper and a number of other hard to find materials.
- We not only supply metals to aircraft mainframe builders and sub-contractors, but we also specialize in supply to aircraft repair facilities throughout North America.

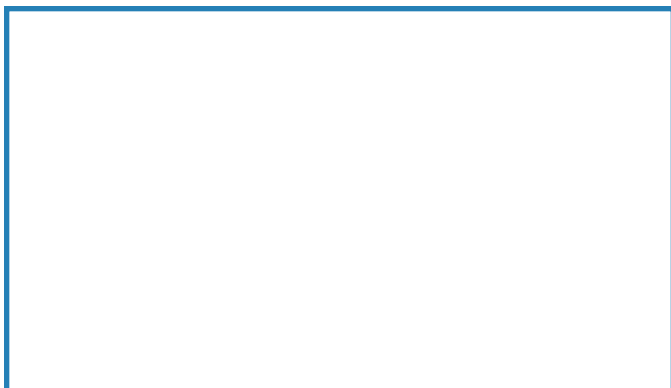

FEATURED PRODUCTS:

- 7050, 7075, 2024 and 2219 aluminum aircraft plate alloys
- Aircraft aluminum sheets – Charleston Aluminum is one of the largest distributors of aerospace sheets in North America including bare and clad material in T0, T3, T6 and T7 tempers.
- A wide range of sheet and plate products from 0.012” to 6.00” plates.
- Charleston Aluminum stocks long products in both extruded and cold finished rounds, flats, and squares as well as many other shapes.
- Aluminum drawn seamless tubes for aircraft applications.
- 4130 steel alloys in sheet plate, tube and bars.
- Stainless steel sheet and plate in 301/304, 321, 17-4 and 15-5 rods, bars, tubes etc.
